## ELEVATING PALLET CARRIER

- \* CAPACITIES FROM 30 TO 400 TONS
- \* CATERPILLAR PRIME MOVERS
- \* ARTICULATED STEERING
- \* HEAVY DUTY EARTHMOVER TIRES
- \* HANDLE ANY PALLETIZED MATERIALS
- \* REAR DUMPING SYSTEMS AVAILABLE

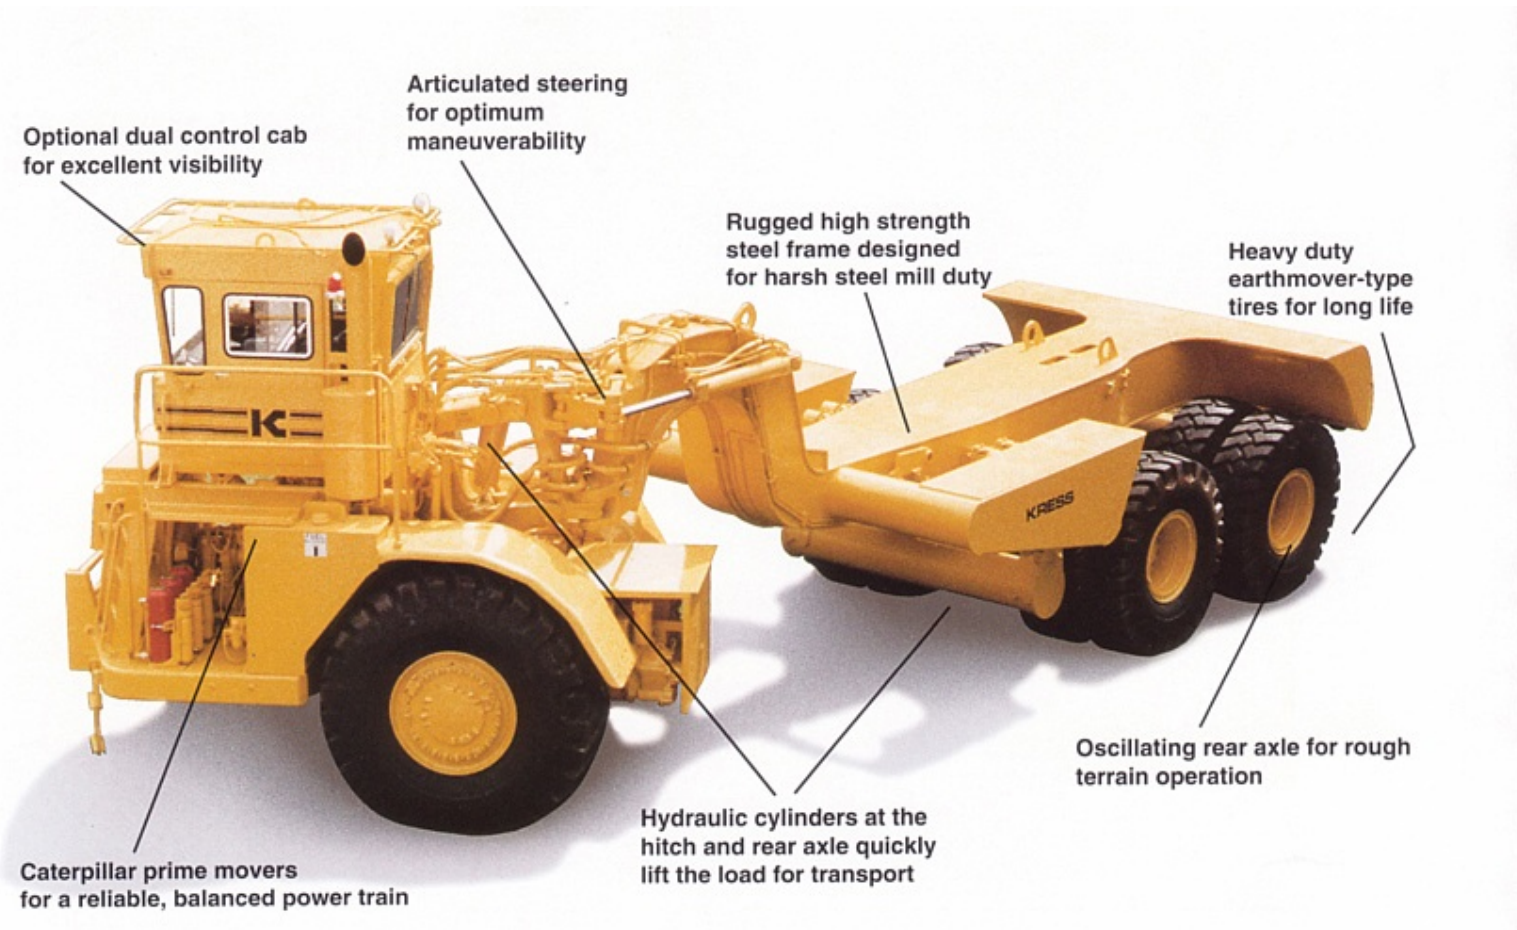

# KRESS ELEVATING PALLET CARRIERS

Kress "EP" and "EPD" Series elevating pallet carriers are custom-designed high capacity transport vehicles capable of handling any material that can be palletized. "EP" Series pallet carriers can transport a variety of materials such as ingots, slabs, blooms, billets, structural shapes, scrap buckets, ladles, and slag pots. Optional full length covers provide weather protection for sensitive products such as steel coils.

Articulated steering and narrow overall width allow exceptional maneuverability for access into confined areas. The vehicle wheelbase and overall width can be tailored to meet the customer's specific requirements.

Kress pallet carriers utilize Caterpillar prime movers matched with simple, rugged carrier components and earthmover rear tires for reliability and long life. Each Kress carrier is designed for continuous operation in a harsh steel mill environment, and uses standard Kress and vendor components located to provide easy access for service and maintenance. Specialized design ensures a carrier that is ideal for the job, can be easily maintained, and has a ready, reliable source of parts and service support.

Kress "EP" Series pallet carriers are available in standard capacities from 30 tons (27 tonnes) to 400 tons (362 tonnes).

**EP-180C with B.O.F. Scrap charging box.**

**EP-200C with pallet for flat products.**

**EP-180C With B.O.F. Scrap charging box**

**EP-660C with steel ladle.**

**EP-300C with E.A.F. Scrap bucket.**

**EP-500C with B.O.F. Scrap charging box.**

## Pallet Carrier Dumping Systems

In addition to the transport capabilities of a normal pallet carrier, the Kress "EM" Series carrier offers the added versatility of a rear dump unit.

With specially designed rear dump bodies, "EPD" Series pallet carriers are able to handle scrap and other materials. The dump body is essentially a free-standing rear dump track body with legs. The Kress pallet carrier can transport the body and tip it to a 45 degree dump angle using a hydraulic cylinder. No manual connections are required between *the carrier and dump* body. By using a variety of body designs, one pallet carrier can handle several different material transport Jobs.

Kress "EPD" Series PaIllet-carriers are available in standard capacities up to 250 tons (226 tonnes).
